

The background is an aerial view of a city skyline, likely New York City, with the Empire State Building prominently visible on the right. The entire image is overlaid with a semi-transparent blue filter. Large, light-blue geometric shapes, including triangles and a square, are scattered across the scene, creating a modern, architectural aesthetic.

VENIAM

The Internet of Moving Things

March 2017

Contact Person: João Barros, CEO
jbarros@veniam.com

We move massive amounts of data between vehicles and the cloud.

MANAGED MOBILE WI-FI

Deliver cost-effective wireless internet access on the move with optional branding and ads.

CLOUD-BASED MANAGED SERVICES

Control your network and services from our cloud platform and use simple APIs for effortless system integration.

HD DATA

Capture rich actionable data about your fleets, vehicles, industrial spaces, and smart cities.

SECURE V2X PLATFORM

Run your applications on a secure V2X mesh, including safety, infotainment and software updates.

HETEROGENEOUS NETWORKING FOR VEHICLES

Leverage cutting-edge wireless technologies, including mesh-enabled DSRC, LTE, Wi-Fi and Bluetooth for future-proof connectivity.

■ VENIAM TIMELINE

VENIAM IS BACKED BY WORLD LEADING VCS AND CORPORATE INVESTORS

■ INDUSTRY RECOGNITION

WHY MASSIVE DATA BETWEEN VEHICLES AND THE CLOUD?

VEHICLE AND FLEET ANALYTICS

Manage product life cycle, improve maintenance, maximize fleet ROI

HIGH-BANDWIDTH INTERNET TRAFFIC

Mobile Wi-Fi for passenger, content for onboard screens

URBAN DATA FOR SMARTER CITIES

Urban sensing using vehicles, IoT sensors, data APIs

AUTONOMOUS VEHICLES

Accelerate product and time-to-market
Maps, software updates, Internet traffic

VIDEO CAMERAS

Increase security and safety,
reduce risks, build maps

4G/LTE ALONE IS NOT ENOUGH

IMPERFECT COVERAGE

- Frequent dead zones
- Loss of data

EXPENSIVE

- High-cost data plans
- Must manage SIMs

CONGESTED

- Exponential growth in traffic
- Licensed frequencies for mobile devices

■ VENIAM PLATFORM: MULTI-NETWORK, MULTI-PURPOSE, UPGRADEABLE

- **LOCAL DATA MANAGEMENT**

Real-time and delay-tolerant data management for optimized cost, prioritization, and context-awareness;

- **MULTI-NETWORK MESH NETWORKING**

DSRC, 4G/LTE, and Wi-Fi with V2X multi-hop, mobility, and bandwidth aggregation for improved connectivity experience;

- **LOW LATENCY**

Fast connection to cloud and edge services for critical real-time and event-driven applications.

KEY HARDWARE, SOFTWARE, AND CLOUD COMPONENTS FOR CONNECTED VEHICLES

Our technology & IP solve the essential networking challenges in connecting moving things

■ 10 YEARS OF WORLD-CLASS R&D BY VENIAM TECH FOUNDERS AND THEIR TEAMS ■

■ FULL-SCALE COMMERCIAL DEPLOYMENT IN PORTO, PORTUGAL

City-scale vehicular mesh network (September 2014 – today)

600+ vehicles, including entire bus fleet, taxis and municipal service vehicles

405,000+ unique Wi-Fi users

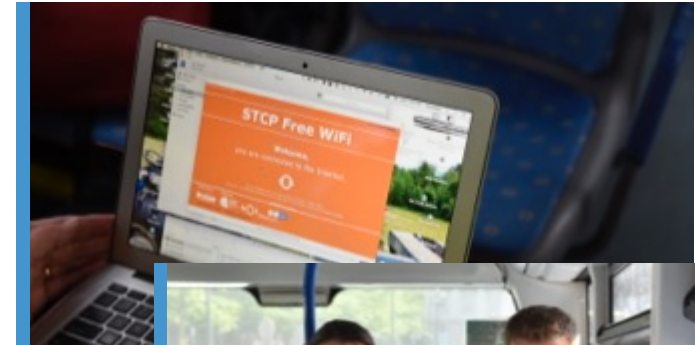

4,400,000+ Internet sessions

2.5 TB of Internet traffic per month

1.3M hours of Internet surfing

70% of traffic offload from cellular to fixed network with 8 APs/km²

Service paid today by Vodafone

Just as a car is more than a faster horse, an autonomous vehicle is more than a self-driving car
